Applications for this job are now closed

Technology Graduate Programme

Salary: £46,500 in Nottingham / £55,500 in London plus a
£5,000 joining bonus

Location: Nottingham or London

Start date: 13th September 2027

Eligibility: Open to any final year students graduating in 2027,
or those who have graduated in 2026. (This includes
undergraduates, masters and PhD students)

Sponsorship: We're able to sponsor if you currently have the
right to work in the UK (including student/graduate visas)

Closing date: 6th September 2026 (subject to close early)

As we recruit on a rolling basis, we recommend applying as soon as you can

Ready to enhance millions of customer journeys? At Capital One, we're on a mission to be a force for good in lending. You might think of us as a credit card company. Truth is, we're just as much a technology business. Throughout our almost 30-year history, we've consistently been recognised as a great place to work; in 2026, Capital One was officially ranked 9th in the UK's Best Workplaces™ list. Hear from our team about what it's like working at Capital One UK.

Using technology to build the future of finance. That's one good thing.

Our Tech teams continuously drive innovation to deliver a positive impact for millions of customers every single day. And that's what makes a career in technology here like nowhere else. Our Graduate programme offers three different rotations within our core engineering teams, ensuring you gain a broad range of experience to support your growth into a well-rounded full-stack software engineer.

You could be:

- Leveraging our cutting-edge technologies to push a mobile feature to millions of users,
- Optimising high-traffic APIs to ensure seamless customer experiences,
- Delivering site reliability upgrades to keep our systems stable and secure,
- Collaborating across diverse, cross-functional teams to build and deliver game-changing digital experiences.

The problems are live, the stack is modern, and the impact is immediate. Imagine your code running in production, shaping how millions of people manage their money. That's not a distant goal here, it's your first few months.

Whichever area you choose, we're invested in your success. You'll receive high-quality professional and technical training designed to drive forward your development and ours. And you won't be navigating this alone. You'll be fully supported by a dedicated manager, professional mentor, and peer buddy as you take on impactful projects to change banking for good.

What you'll need

We don't mind what degree background or grades you have, but we want to see:

- You have a strong foundation of coding skills (in any language).
- You have the flexibility and aptitude for the learning it takes to master lots of different tools and technologies.
- Your approach to coding and ability to solve complex technical problems.
- How you communicate and collaborate with others.
- Your enthusiasm for tech and Capital One.

The Recruitment Process

Step 1: Apply! We don't screen CV's so there's no need to tailor your CV or attach a cover letter. If you meet the eligibility criteria you will be sent online testing to complete, assessing the core skills required for the role.

Step 2: One-way video interview, looking at your motivations for the role and some examples where you've shown the soft skills we're looking for.

Step 3: Virtual assessment day, consisting of a pair programming exercise and a presentation and strengths based interview.

Step 4: In-person final interview with one of our Senior Software Engineering Managers, and the opportunity to look around our office.

Where and how you'll work

This is a permanent position based either in our Nottingham or London office.

We embrace a hybrid approach to work. You'll spend three days a week in the office (Tuesday-Thursday), with Monday and Friday being optional work-from-home days.

Our offices are designed to inspire and support you. At our Nottingham head office, you'll find an on-site gym, restaurant and dedicated Learning Loft. Our London office boasts a rooftop running track and coffee bar.

What's in it for you

We invest in the growth of our people alongside our business. You will have extensive opportunities to learn and develop your career, including access to up to £5,000 in funding for external qualifications.

In addition to career development, our comprehensive benefits package is designed to grow with you, ensuring your wellbeing is prioritised at every stage of your career:

- Wealth & Future: Competitive pension and performance-
