Apply Now

Kickstart a purposeful career in GLC

This programme presents an opportunity to work at one of the world's largest sovereign wealth funds that focuses on investing for the long term. You will undergo foundational training that will equip you with the knowledge required to excel in the role. As you rotate through different departments, you will be provided with a tailored work plan to enhance your on-the-job learning and development.

What Are We Looking For?

We are looking for individuals ready to make an impact in any of the following fields:

Investment Professionals

Be part of GIC's diverse investment strategies, driving long-term value across public and private markets such as equities, fixed income, private equity, infrastructure and real estate.

Technology

Be part of the team driving our innovation. As a software engineer, data engineer, cybersecurity professional, infrastructure developer, or quantitative researcher, you'll help design the advanced technological solutions that shape our organisation's future.

Corporate Services

Shape every part of our organisation, from investing to technology. Whether you're driving strategy, managing communications, overseeing risk, or running operations, your work makes a real impact.

► We welcome students of any nationality and academic discipline, with no more than one year of full-time work experience, to join us.

What We offer:

Immersive Training and Rotations

Build a strong foundation through structured learning and curated rotations across various business areas in the firm.

Meaningful Work

Take on impactful projects in an AI-enabled workplace, developing both investment judgement and AI fluency from day one.

Global Community

Connect with a diverse network of GICians across our 11 global offices, gaining perspectives and building valuable relationships.

Career Progression

Accelerated growth as you take on significant responsibilities from the very beginning.

Selection Process for Investment and Corporate Services Tracks

1

Online Assessment

Focused on numerical, verbal and abstract reasoning.

2

Case Study

Focused on understanding, connecting and applying a business case.

3

Interview

With HR and Business Leaders to assess your business acumen and fit for the role.

Selection Process for Technology Track

1

Online Assessment

Focused on numerical, verbal and abstract reasoning.

2
